

# Duraflex

## PREMIUM POLYMER FORTIFIER FOR ASPHALT EMULSION

Duraflex is a water-based polymer-latex additive designed as a fortifier for PaveShield, an asphalt emulsion pavement sealer. PaveShield fortified with Duraflex will exhibit superior durability and improved drying time than unfortified pavement sealers.

- **SUPERIOR DURABILITY**

*Improved toughness and lengthened life of coating.*

- **FAST SETTING**

*Speeds up drying of pavement sealer; even in cool or cloudy conditions.*

- **BEAUTIFIES**

*Reduces scuffing and tearing and creates a more uniform, darker, black color of the finished coating.*

- **QUICK ACCESS**

*Allows owners to open pavement traffic sooner.*

- **LESS DILUTION**

*More solids on the ground.*

## Introducing Neyra's Newest Product - DURAFLEX

*Duraflex, when added to PaveShield, will make the dry coating blacker, tougher and more resistant to higher traffic loads and scuffing. It is especially recommended in applications where initial toughness is critical due to high traffic volume and/or the need for immediate use of the pavement.*

Neyra Industries have been a leader in the pavement maintenance industry for over three decades. It is our passion to develop high quality products that exceed industry standards. Duraflex and other Neyra products are available nationally at our plants and through distributors and contractors.
