

PREMIUM COAL TAR SEALER

Jennite is a premium quality pavement coating composed of refined coal tar that is fortified with rubber prior to emulsification. The resulting high solids product can be applied with no dilution. In addition, Jennite contains a unique surfactant formulation which allows greater compatibility with asphalt surfaces.

The Jennite Surfacing System offers protection that no other product or contractor can provide: a written dual performance warranty.

*Preserve Your Investment with
the Best Protection Possible -
The Standard of Excellence
Since 1938.*

• ULTIMATE PROTECTION

The high solids, polymer modified formula provides increased resistance to oil, gasoline and chemicals.

• MAXIMUM DURABILITY

No dilution required means you can expect up to three times the wear of other pavement coatings.

• SAFE & EASIER TO CLEAN

The Jennite System creates a seamless, skid-resistant and even-textured surface.

• LUSTROUS BLACK FINISH

Jennite's tough, tight, waterproof seal is the longest lasting pavement coating.

No Other Pavement Sealer Lasts Longer - Dual Protection Warranty:

Neyra Industries works in partnership with our licensed Jennite contractors to offer you this unique protection: the manufacturer warranties the product and the contractor warranties the installation. Only Jennite trained and licensed contractors can buy and apply the Jennite Surfacing System. Neyra Industries delivers a Certificate of Authenticity with every Jennite shipment.

Rely on our many years of experience for expert guidance in choosing the best pavement management solution for your property. Jennite delivers the longest lasting asphalt pavement protection with the lowest annualized cost as well as the advantage of being a fully deductible maintenance expense.
